

ACADEMY BARIATRIC CUSHION

A perfect balance of pressure relief and stability for larger users.

The **Vicair® Academy Bariatric Cushion** was designed for larger users, giving them better stability and improved pressure distribution and making the chance of bottoming out extremely low. Each **Academy Bariatric** cushion, with its unique SmartCell™ construction, is adjustable for cell density, enabling 'custom made' solutions such as in cases of severe body-asymmetry. **Vicair® Academy Bariatric** cushions require very low maintenance. They are easy to clean and have a long effective lifespan.

Vicair® Technology is a customisable system of small, flexible cells contained in strategically placed compartments of the cushion. These cells have a low friction level when in contact with each other and thus continuously adapt and conform to the body's contours. Each **Vicair® Academy Bariatric** cushion contains hundreds of air-filled SmartCells™ with low surface friction, which allows them to move easily against each other and to conform precisely to the body's contours. The individual deformation of the SmartCells™ further enhances this process.

The result is a stable and comfortable body support, combined with superior pressure distribution. The cushion is divided into several compartments, each filled to its own cell density, thus creating an optimal environment to deal with pressure and shear forces.

The low maintenance **Vicair® Bariatric Cushion** uses hundreds of small, flexible, fabric coated cells, so there are no concerns about the cushion deflating or leaking bags of gel. If one is damaged, the single cell is replaced, not the entire cushion. It's also very easy to clean; the outer cover is machine washable and the inside cushion can be simply wiped with an all-purpose cleaner.

The **Vicair®** Bariatric Cushion gives excellent pressure relief and stability to promote better positioning and balance for larger users.

- For larger users
- High-performance pressure distribution
- Stable positioning
- Ultra low weight
- Individually adjustable
- Low maintenance
- Safe and reliable in use
- Clinically proven

ACADEMY BARIATRIC CUSHION

A perfect balance of pressure relief and stability for larger users.

Vicair® Academy Bariatric cushions offer a perfect balance of high-quality pressure distribution and stable positioning for larger users. They are available in 10cm height and contain hundreds of air-filled Smartcells™ with low-surface friction, which allows them to move easily against each other and to conform precisely to the body's contours. The result is a stable and comfortable body support, combined with superior pressure distribution.
