

A 1 cm increment and special seat height and tipping point adjustment make the TRAVELER indispensable and the exact seat positioning unbeatable. The combination of adjustable backrest and adaptable backrest covering with breathable cushion, enables an upright posture and better seat stability regardless of the angle of the seat. A folding backrest bow stabilises the sag of the backrest covering.

With a weight from 11.8 kg, a customized quality frame and distinct advantages when used daily, the TRAVELER leaves nothing to be desired.

TRAVELER

Folding wheelchair

Printed in Germany 12/2005. Technical changes and printing errors excepted.
CE Colour deviations from actual product colours are possible due to reasons relating to printing techniques.

Narrow passages! – no problem with the TRAVELER, just fold the sides inwards

The folding backrest can be adjusted without tools to 7 different angles and folded down for transport

„A Traveler’s Tales...”

Thanks to its small dimensions and its rigid frame, the TRAVELER is a reliable and trustworthy companion wherever your journey takes you. At the heart of the TRAVELER is its reliable, horizontal folding mechanism with 8 arms that not only ensures rigidity but also an unbeatable packing dimension.

The TRAVELER gives you the confidence you need to overcome the obstacles of everyday life. Even narrow passages such as toilets, lifts or narrow parking spaces can be negotiated without assistance. The overall width can be reduced by 4 to 6 cm by folding the wheelchair inwards.

Thanks to its tried-and-tested quality in everyday use, many users even describe the easy to handle TRAVELER as „indestructible”. As a result of our active exchange of experience with customers, we are pleased to be able to offer new options and accessories, guaranteeing optimum adaptation of the wheelchair to the requirements of every user. High-class design is complemented by a wide range of colours and the finest PRO ACTIV craftsmanship.

It’s amazing how compact the TRAVELER is – 17x35x58cm to be precise and easy to store in the boot of a small car, as hand luggage in aeroplanes or even in a sports bag

Thanks to its extremely torsion-resistant and reliable folding mechanism, the TRAVELER features the characteristics of a rigid frame wheelchair

The folding backrest bow stabilises the sag of the backrest covering to ensure an optimum posture

Heavy duty version – up to body weight of 150 kg and seat width of 52 cm

Suspension forks – reduce pain sensitiveness and paroxysmal extensor spasms caused by uneven terrain

The FREEWAY gives you even more freedom of movement and is easy to drive or push. The adapter is easy to detach and can also be used for the adaptive bike
